1993 Patent Examiner's Action Survey

As part of the continuing quality reinforcement efforts of the Patent and Trademark Office, the Office will be sending out a Patent Action Survey Form with each Patent Examiner's Office action mailed during a period of several weeks during December, 1993-January, 1994.

The survey is intended to determine whether Office actions are perceived to be clear and complete on certain specific and important items related to patent examining practices and procedures. The results of the survey will be used in the development of Office training programs. The survey is a follow-up to the Patent Action Surveys conducted in 1991 and 1992. Where training is provided to address identified deficiences in performance, follow-up surveys are intended to be conducted in the future to determine whether the training was effective enough to improve performance in the measured areas.

The Survey Form is brief and easy to complete and does not permit identification of the respondent or of the particular application involved. The Survey Form may be completed at the time of response to the Office Action. It is possible that a practitioner may receive many Office Actions containing a Survey Form during the survey period. To have results that are meaningful, The Office needs a high response rate. Therefore, it is *important* that patent practitioners complete each survey form *no later than the time of response to the Office action being surveyed*. To assure that this form is completed and mailed backto the address indicated on the Survey Form, it would be desirable for the patent practitioners to have their office managers/docketing personnel take appropriate steps to keep the form and Office action together for the practitioner's benefit.

Your cooperation in completing the Survey Form is appreciated.

Notice of Trademark Application Fee Increase

Public Law 103-179, which was enacted on December 3, 1993, increases the fee for filing a trademark application from $210 per class to $245 per class. No other patent or trademark fee is affected by this law. A notice of proposed rulemaking announcing the Patent and Trademark Office's intention to raise the trademark application filing fee to $245 per class was published in the *Federal Register* on July 21, 1993 at 58 FR 39102, and in the *Official Gazette of the United States Patent and Trademark Office* on July 27, 1993 at 1152 OG 91.

Any trademark application submitted on or after December 3, 1993 is subject to the new fee amount. Any trademark application received with an authorization to charge a deposit account for the amount of deficient fees will be charged the amount due under the new fee schedule.

There will be a grace period of 60 days, beginning December 3, 1993, and ending January 31, 1994. During the grace period, any party who submits a trademark application, which is otherwise sufficient, with a fee of at least $210, but less than $245, will be notified of the fee deficiency and permitted to supplement it within a 30-day period set by the notice of the insufficient fee. If the applicant submits the amount by which the fee is deficient within the 30-day period, the application will retain its original filing date. If the amount by which the fee is deficient is not submitted within 30 days, the application papers and fee will be returned to the applicant. Any trademark application submitted after January 31, 1994 with a deficient fee payment will be returned to the applicant.

A notice has been submitted to the Office of the Federal Register for publication. For further information, please contact Robert Kopson by telephone at (703) 305-8510 or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections. All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
